Conference 45'

Title: "Hypnotherapy with Severe Mental Disorders. Clinical implications at the time of the COVID-19"

Objectives:

Supply:

- 1) An updated study on the etiopathogenesis of psychiatric diseases
- 2) Hypnotic techniques for the treatment of severe mental disorders
- 3) Hypnotic online techniques for the treatment of severe mental disorders

Content: Starting from the analysis of the most up-to-date researches in the field of etiopathogenesis and diagnosis of psychiatric disorders, the conference will provide reflections and technical tools for the treatment of severe mental disorders with hypnosis.

In particular, I'll discuss treatment criteria and hypnotic intervention strategies with subjects who have undergone experiences of maltreatment and neglect.

Moreover, starting from the general considerations on the modifications of the setting imposed by the Covid-19 pandemic, during the conference, a series of reflections on the use of the most modern technologies in the online treatment of psychiatric subjects with hypnosis will be provided.

Keywords: Hypnotherapy, COVID, Severe Mental Disorders, Online Hypnotherapy
